15 Years of European Public-Public Partnerships in Research & Innovation

Great achievements with stronger potential

Effie Amanatidou, University of Manchester

Annual Joint Programming Conference
Brussels, 7-8 November 2017

Outline

- Great achievements in an evolving era
- Untapped potential within a challenging future
- The way ahead for a rewarding future

Great achievements in an evolving era

Annual Joint Programming Conference
Brussels, 7-8 November 2017

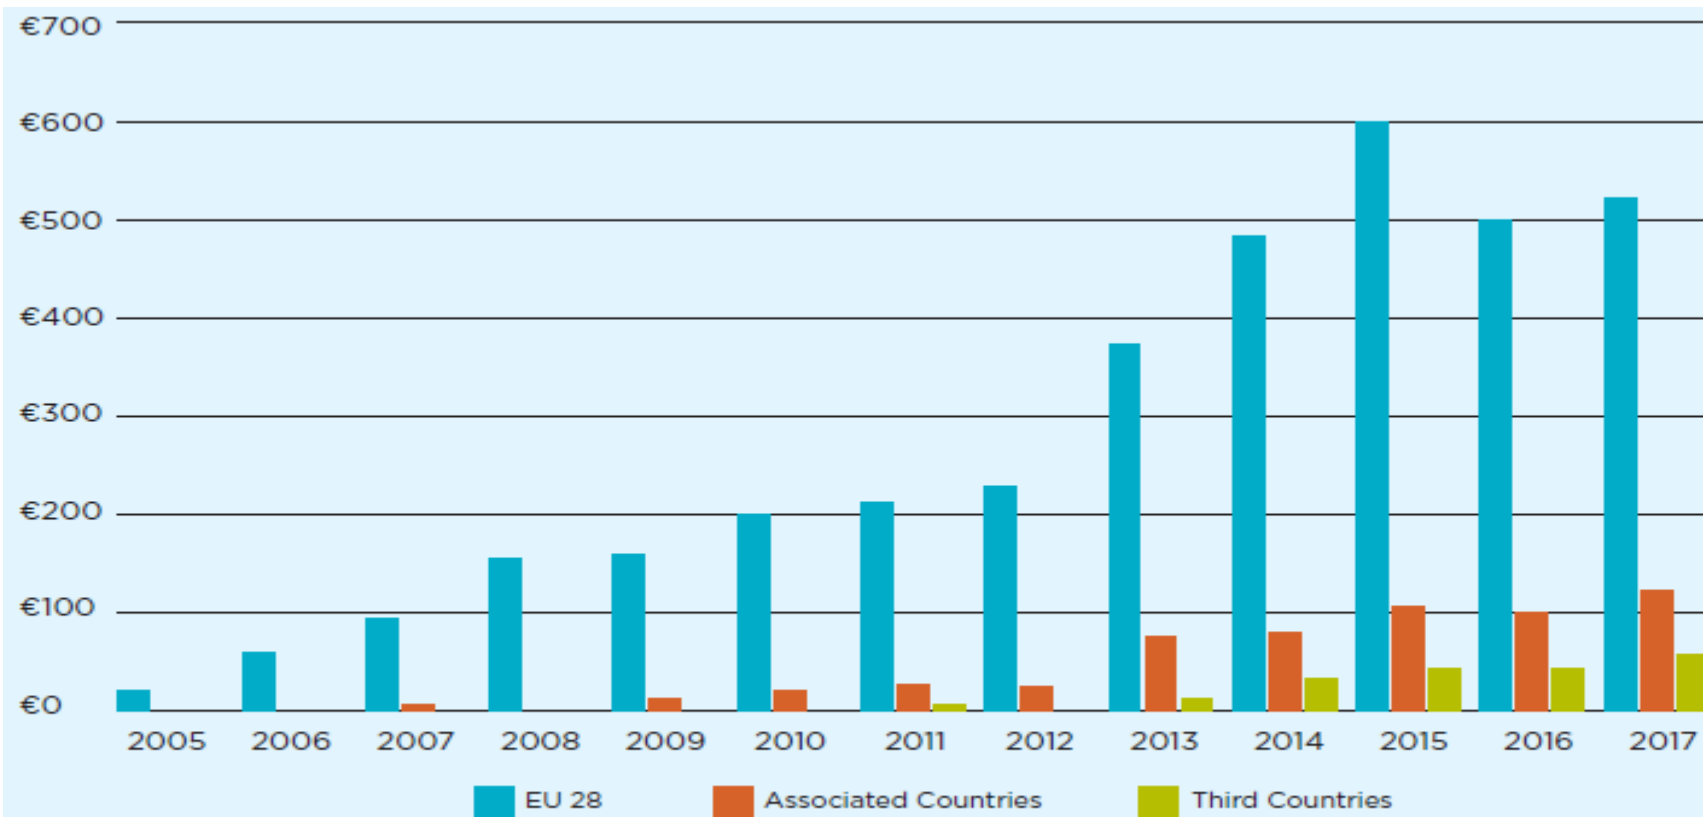

Total number of P2Ps created since 2002 (including active and non-active P2Ps)

Network Type	Number
ERA-NETs	160
ERA-NET Plus	22
ERA-NET Cofunds*	46
EJP Cofund	3
Art 169/185s	10
JPIs	10
Self-sustained	14
Total	265

Untapped potential within a challenging future

Annual Joint Programming Conference
Brussels, 7-8 November 2017

- A coordinated and coherent P2P strategy across the national and European level
 - Deliberations for the next Framework Programme offer the option to design and implement such a multi-level approach to joint programming. This may also assign P2Ps a more strategic role at the national level.
- Streamlining the overpopulated landscape of ERA supporting instruments
 - Establishing synergies; deciding on life-cycles and exit strategies
- Increasing commitment to deliver the envisaged impact
 - Diverse levels of commitment and readiness to take part
- Reaching out beyond the research community

The way ahead for a rewarding future

Annual Joint Programming Conference
Brussels, 7-8 November 2017

Prerequisites for successful joint programming: clear goals stemming from a joint vision; their manifestation in a strategic research and innovation agenda; long-term commitment; and evidence of ‘substance’, as reflected by the number of countries involved, the range of participating stakeholders, and budget volume.

- Revisit missions and manage expectations
- A new (policy) narrative
- A wider P2P partnering approach
- Evidence of impacts and demonstration of added value
- From “defending the interests of our own country” to “working for the greater good”
