ERA-LEARN 2020: Objectives

- provide a **web-based information, learning and support platform for P2P**;
- support the ongoing optimisation of P2P networks by **expanding the ERA-LEARN toolbox** to include the wider activities of joint programming, particularly the **ERA-NET Cofund, Art.185, JPIs**
- implement a systematic process for **monitoring & impact assessment of P2P** networks, including their impacts at both the policy, programme and co-funded RTD project-level;
- assess and benchmark **current approaches to alignment** and explore **options for new modalities** that will better align national and/or regional activities under common research agendas;
- implement an annual cycle of **knowledge exchange** aimed at **increasing the impact of investment in P2P activities** and exploring options to **support less research intensive countries**.

- Increased **efficiency** of public administration & policy learning
- Increased **awareness** of joint programming and establishment of added value
- Improved **understanding** of the joint programming approach to policy making and
- implementation and development of **common approaches**
