News and Event Publication Policy

The ERA-LEARN platform www.era-learn.eu now includes a news and a calender section. P2P network coordinators and EL2020 consortium partners are invited to publish items with relevance for the P2P community.

Core target group of the EL2020 news section are stakeholders in European P2P projects. Subscribers are e.g. experts from research ministries and administrations, implementing organisations of P2P initiatives, or other innovation promotion agencies. Some professors, scientists and developers are also listed. The Website is currently visited by more than 4.000 users per month.

News subjects may regard
- general information relevant for the P2P community. Examples: "CO-CREATION-2016-13 call title to address the interoperability and increasing sustainability of transnational research programme cooperation" or "Save the date: ERA-LEARN conference 2016", or "Memberstate x´s new funding policy opens national programs to funding for applicants from all neighboring countries"
- individual P2P networks, insofar as the information is relevant for a substantial number of other members of the News target group. Example: "Next Y-ERA.NET call extended to applicants from space and transport application areas" or "New process design allows for processing time of funding applications <4 weeks."

News subjects should not regard
- information that is relevant only for one single P2P network. Example: "Y-ERA.net announced its 10th call for transnational projects",
- information that is of little relevance to specific aspects of P2Ps. Example: "Financial Guidelines for H2020 published" or "Information day on H2020 in Berlin"

News content shall be
- kept brief (<1000 characters), and include a reference and a link to the source of further information

Upload

Upload is technically realized by completing the forms available here:

Event publication: https://www.era-learn.eu/events/@@add-event
News publication: https://www.era-learn.eu/news/@@add-newsitem

Publication requests will be checked and realized within few days.
